PROJECT DESCRIPTION

I. GENERAL

This project involves the reconstruction of an existing Traffic Control Signal with Interconnect at the intersection of MD 2 (Gov Ritchie Hwy) and Jones Station Rd in Anne Arundel County. A new mast arm traffic signal design with LED signal heads, Countdown pedestrian signals with audible pushbuttons and video detection for all approaches shall be installed at this location. MD 2 (Gov Ritchie Hwy) is assumed to run a north-south direction.

II. INTERSECTION OPERATION

- The intersection shall continue to operate in a NEMA six-phase, fully-actuated mode, with the MD 2 (Gov Ritchie Hwy) approaches running concurrently. Exclusive left turn phases shall continue to be provided for both approaches of MD 2 (Gov Ritchie Hwy). A right turn overlap phase for eastbound Jones Station Road shall be provided. The pedestrian phase across the north leg of MD 2 (Gov Ritchie Hwy) shall now be a Countdown pedestrian phase with audible pushbutton actuation. The pedestrian phases across Jones Station shall now be Countdown pedestrian phases with audible pushbuttons on recall. The Jones Station Road approaches shall continue to operate in a split phase mode. The right turn overlap phase for the westbound approach of Jones Station Road shall remain in operation.
- A new full-traffic-actuated, eight-phase controller with video interface, 2-wire Control Unit and all necessary equipment housed in a NEMA size "6" base-mounted cabinet shall be installed at this intersection.

III. SPECIAL NOTES

- The Contractor shall be responsible for terminating all signal cables, to the appropriate terminals and shall properly label each cable.
- All controller cabinet wiring will be performed by the S.H.A. Signal Shop Contact Mr. Ed Rodenhizer at (410) 787-7652 seventy-two hours in advance of intended work.
- All underground and overhead utilities shown on these plans are schematic only and may not be complete. The Contractor shall be responsible for notifying Miss Utility prior to construction so that all utilities may be located in the field. If the Contractor perceives that a conflict between the utilities and the traffic signal will occur, the Contractor shall notify the Project Engineer immediately so that the conflict may be resolved.
- Upon completion of this project, the Contractor shall notify Mr. Robert Snyder at (410) 787-7631 to arrange for the relocation of the existing phone drop. The Contractor is to provide Mr. Robert Snyder with the nearest street address, zip code and phone number

5. APS will function as follows:

TO CROSS MD 2 (GOV RITCHIE HWY)

- When pedestrian locates and presses the pushbutton for an extended time, the pushbutton unit will announce the following message "Wait to cross Governor Ritchie at Jones Station".
- When the WALK phase begins, the pushbutton unit will provide a rapid tick which will last for the duration of the WALK phase.

TO CROSS JONES STATION

- When pedestrian locates and presses the pushbutton for an extended time, the pushbutton unit will announce the following message "Wait to cross Jones Station at Governor Ritchie".
- When the WALK phase begins, the pushbutton unit will provide a rapid tick which will last for the duration of the WALK phase.
